Prerequisites

Demo Login Information

This section contains specific information your team will need to login to the demo environment, or to access demo content. Include any URL's, login details and fictitious persona details.

For this demo, you will be using the Sally Smith persona, to set up a free Microsoft Account

URL: <http://www.outlook.com>

Credentials: The credentials will be created in the Post-Install Steps.

First-Time Post-Install Steps

If this is the first time you are using the demo environment, complete the [Post-Install Steps](#) at the end of this document.

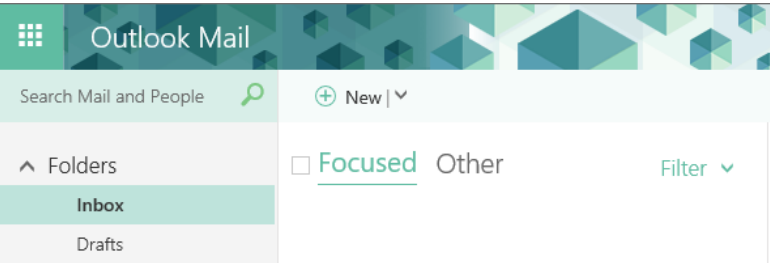

Pre-Demo Setup Steps

Complete the following steps prior to each presentation of the demo:

1. If you do not already have it open, start a browser session and go to <http://www.outlook.com>.
 - a. Sign in using Sally Smith's credentials created in the Post-Install Steps, and begin in the **Inbox**.

Do More with a Microsoft Account - Demo Steps

Speaker Script	Click Steps
<p>Take control. Do more.</p> <p>Sally Smith has just finished creating a free Microsoft account, and is starting out by exploring her new Outlook inbox.</p>	

Speaker Script	Click Steps
<p>Outlook is the free email and calendar service that helps Sally stay on top of what matters, and get things done.</p> <p>The Focused Inbox feature will help Sally by prioritizing important emails into this Focused view.</p> <p>Focused Inbox intelligently presorts your email so you can focus on what matters. It places your most important emails in Focused and the rest in Other.</p> <p>Focused Inbox works across all of your email accounts, personal and professional.</p> <p>To create an inbox that "feels right" to you, the system takes into account emails and contacts with whom you interact, and filters out noisy sources like automatically generated or bulk email. The more you use it, the better it gets. You can easily reclassify emails between Focused and Other. Just open an email, then select "Move to Focused/Non-Focused" from the overflow menu.</p> <p>During setup, Sally created a signature which is automatically added below each new message. She also has rich formatting options, including inserting images, and using add-ins.</p> <p>To explore what her new message options are, Sally sends a test message to herself.</p>	<ol style="list-style-type: none"> 1. At the top of the Inbox, point to Focused.  2. Next to Focused, click on Other. 3. Above Focused, click New to open a new message. <ol style="list-style-type: none"> a. Point to the Signature. b. At the bottom of the message, point to the rich formatting options. 4. Click the To field, and type Sally's email address created in the Post-Install steps. 5. Click Add a subject and type Test. 6. Click Send.

Speaker Script	Click Steps
<p>Optimized Actions</p> <p>Once the message arrives, Sally sees that she has some immediate options available to her as she hovers on the message. A single click is all it takes to delete, mark unread, flag, or pin to the top, without even needing to select the message first.</p>	<p>7. Pause over the new message to display.</p>

More than just email

Speaker Script	Click Steps
<p>Outlook.com automatically connects you to a host of Microsoft apps and services including OneDrive, Skype, OneNote, Office Online applications, and more.</p> <p>With your Outlook.com address you can sign in to Skype, find your contacts, view your Calendar, and work in Word Online.</p> <p>In this case, Sally is going to choose the Event flyer template and get started on a flyer for her neighborhood potluck.</p> <p>She saves the file directly to her OneDrive. Her Outlook.com inbox comes with 5 GB of free online storage on OneDrive for files and photos. Once files are in OneDrive, she can get to them from the OneDrive website or from the OneDrive app on her any of her mobile devices.</p>	<ol style="list-style-type: none"> 1. In the upper left, click the App Launcher. <ol style="list-style-type: none"> a. Pause to display the various options as you list them. 2. Click Word. 3. In the templates displayed, click Event flyer. 4. Click to the left of [Event Name], then drag to highlight. 5. Type Neighborhood Potluck. <ol style="list-style-type: none"> 1. Click File. 2. Click Save As. 3. Click Documents. 4. Click Save. 5. When prompted to enter a name, delete Documents and type Potluck Flyer.

Speaker Script	Click Steps
<p>After saving, she decides to Share the file with her fellow event coordinators. Since OneDrive is built in to Outlook.com, it's easy to save and share received attachments, documents, photos, or videos.</p> <p>She can even assign permissions, right from within the document! Here she can send an invitation, with the permissions below set to Recipients can edit. Clicking for more options, she can change this to view only. Below this, she can see that Recipients don't need a Microsoft account. If she wanted to restrict sharing further, she could change this to require sign-in.</p> <p>Instead, she is going to choose Get a link, and send a personalized message from her inbox.</p> <p>She has the same option to make this link editable or view only.</p> <p>Once created, she can just copy and paste it into a message, a Skype chat window, or where ever she needs to share it.</p> <p>Navigating over to her OneDrive, Sally reviews the settings she just applied from within the document.</p> <p>Here, she can clearly see the sharing icon on the Potluck Flyer file, where it does not appear on the file next to it. By selecting the file and displaying the Information pane, she can review who has access, and see any sharing links she has created. She</p>	<ol style="list-style-type: none"> 6. Click Save. 7. In the upper right, click Share. 8. On the Invite people tab, below the quick note field, point to Recipients can edit. 9. Click Recipients can edit to display more options. 10. To the right of Recipients can edit, click the drop-down arrow. 11. Click Recipients can only view. 12. Point to Recipients don't need a Microsoft account. 13. To the left, click Get a link. 14. On the right, to the right of Edit, click the drop-down arrow. 15. Pause to display View only. 16. Click the drop-down arrow again to close. 17. Click Create link. 18. Click Close. 19. Click the App Launcher. 20. Click OneDrive. 21. Click the Documents folder. 22. On the file Potluck Flyer.docx, point to the Sharing icon. 23. Select the file by hovering on it, and clicking the check mark that appears in the upper right.

Speaker Script	Click Steps
<p>can easily remove the link and remove access simply by clicking the X to the right.</p> <p>Do more wherever you go with a Microsoft account! Stay organized with efficiency tools in Outlook, get to and share your documents, photos, and other files from any device you use. Use the Office mobile apps to stay productive and work together, no matter where you are. A Microsoft account helps you take control and do more!</p>	<p>24. In the upper right of the browser window, click the Information pane icon ()</p> <p>25. Under Has Access, hover on the link icon to display tooltip.</p> <p>26. Click the link icon.</p> <p>27. To the right of the link, click the X.</p> <p>28. On the Remove link dialog box that appears, click Remove link.</p>
